called Siraja Pidakas. Hard, white spots, slightly elevated, and looking like drops of water and having the colour df bell-metal are called Valasas. Swellings appearing about the unions of the pupils, marked by an aching pain and suppuration and discharge of pus, are called Puyalasas. A large nodular swelling appearing about the union of the pupil and iris, attended with a slight pn/m and an itching sensation, and which is found hut to pirtially suppurate, is rnllfvl Upanalia. The morbific principles by taking recourse to the lachrymial sacs of the eyes, affects the four places of union^ in that organ. This desease is called Srava-Roga, or N» ranadi, according to others. A swelling, which occurs about any of these places of union, and which suppurates and secretes pus, is called PuyasraVa. This desease is due to the concerted action of the deranged Vayu, Plttam, and Kaphah. A similar sw lling, which suppurates and discharges! thick, slimy and white-coloured pus, is called Slcshma-SraVa. A similar' swelling that discharges blocd is called Raktasrdva,i which is due to the action of the enraged blood. A similar discharge of hot, thin, watery, yellow-coloured fluid is called Pitta-Srava. A thin, circufar, copper-coloured swelling at-tended(with an aching pain and burning sensation and appearing about the nleeting of the iris and sclerotic is called Parvani. Alajis appear about the same places of jinion, and their symptoms have been described before (Vide,

chapter on Meha). Parasites germinating in the folds of J.he eyelids and about the blending of the eyelids' and sclerotic gra'lully tend to affect the entire organ of vision.

Now I shall discourse on the Nidanam of diseases that affect'the eye-lids. Thick, copper-coloured PustUes appearing on the lower lids attended with an itching sensation, and with their heads pointed inward and full of pus, are .called Utsanga Pidakas.- These pustules are attributed to the concerted action of the deranged Vayu, Pittam, and Kaphah, Pustules appearing at the ends of the eyelids, and resemblir.
